

Bennett Big Squirt Truck Stop Dispensers

When it comes to high speed fuel dispensing...

We've Got It All

- Integrated Fiscal Payment Terminal
- High or Low Hose Style Cabinets
- 40-gpm or 60-gmp Flow Rates
- Masters, Satellites, or Combinations
- Dual Masters and Dual Satellites
- Dual Master/Dual Satellite Model in Same Cabinet

Bennett Big Squirt Truck Stop Dispensers

We are the only dispenser supplier to offer two master products on the front side and two satellite products on the rear side in a single, compact 30-inch wide high hose cabinet.

Bennett/Fiscal Integrated Self-Service Dispenser
(also available for two product dispenser)

Fiscal Outdoor Payment Terminal in Dispenser is
a quick and easy Field Installed Option

Fiscal Outdoor Payment Terminal

What happens when you move the Fiscal Outdoor Payment Terminal from its island pedestal and place it in the face of the fuel dispenser?

It becomes immediately apparent to drivers that they can serve themselves, handling most payment options without the aid of your fuel desk.

The large full color backlit display and intuitive design captures your customers attention from the moment they approach the fuel dispenser. It continues to command their attention throughout the fueling process allowing you to promote your brand and your inside products and services.

Designed exclusively for truck stops and travel plazas the Fiscal system is truly a self service customer representative guiding users through their fueling transactions without the need for help from your fuel desk personnel.

You'll immediately see the benefits of integrating the payment system in the dispenser:

- Improved Speed of Service - no need for that long walk to and from the fuel desk.
- Decreased in-store labor requirements on your fuel desk - drivers serve themselves.
- Increased sales - deploy your marketing programs at the fuel dispenser from any central location.
- Improved customer loyalty and brand awareness - deliver an enhanced customer experience. Communicate with every customer by extending your brand and products/service offerings to the fuel dispenser.

Fiscal Outdoor Payment System can integrate with the Fiscal Systems POS or can interface to Trender's OmiDesq or MultiDesq

We have the most comprehensive line-up of Truck Stop Dispensers.

If you are currently piped for two products in a single cabinet, we can replace your dispenser with our two product Big Squirt dispenser without breaking concrete on your islands.

Even if you're currently piped for only one product per dispenser cabinet, with the growth of bio-diesel you may want to consider offering two products at a single fueling point.

To further conserve island space, we can even offer a two product master (both hoses on the same side) and a two product satellite on the backside of the same dispenser cabinet. The master-master / satellite-satellite combination single cabinets can be integrated across all your interior fueling lanes with a master-master (no satellites) at one end and a satellite-satellite (no masters) at the other end.

To keep *cost of ownership* as low as possible, our Big Squirt series is available in a high hose style dispenser.

- No costly hose retractors to maintain.
- Reduced hose wear and tear.
- Ease of use for your customer.
- Attractive 21st century styling.
- Full sized high hose satellites.

And, of course, if you happen to like traditional low hose style dispensers, we offer them as well in various product configurations. (not available with integrated Fiscal Payment Terminal)

Don't Troubleshoot, Just Replace in a Few Minutes.
Your Resident Maintenance Personnel Can Service this Dispenser.**

It doesn't get any simpler than Bennett's streamlined electronic systems. The main display for each hose includes the display, CPU, power supply, electronic calibration feature, current loop interface, electromechanical totalizer, battery backup for last sale recall, and field wiring terminal strip - all of this on a single circuit board.

Our self-paced, FREE Service Training Course allows technicians to quickly become competent to repair the Big Squirt series. Many customers certify their own resident maintenance personnel and with the few parts required, can quickly make any needed minor repairs. Our single board design simplifies troubleshooting and repair to get you back in service fast.
