---

**Distribution to: RETAIL & COMMERCIAL** USA Distributors, Service Reps, Installers that have purchased or are servicing and installing GoPump electronic dispensers.

**Subject:** Home Study Course and Certification Exam for GoPump Dispensers

---

Technical Services at Bennett Pump Company is pleased to announce the availability of the GoPump Home Study Course. This training is designed for the people that have purchased the GoPump dispenser and are familiar with the Bennett style electronic dispensers, and for technicians/service people that are fairly new to the industry. This training program was created to alleviate some of the cost associated with sending your technicians to classroom training.

The training is offered on CD ROM. The intended audience is for Installers (Installer training) and for people that intend to service the equipment (Service training). One CD ROM course covers both installers and service technicians. An exam is included that must be sent back to Bennett Technical Support for grading. Bennett will notify the student of the exam results and issue certification.

The training "modules" are designed for self paced Home Study. They are in Power Point show format. Power Point "Viewer" is included on the CD. You will not have to have Microsoft Power Point installed on your PC to take this training. Follow the User Guide to run the training program.

Classroom training will still be offered each calendar quarter at Bennett Pump Company Headquarters and certain field classes on an as needed basis. Certification will be required through either Home Study or Classroom training by June 1, 2004 for Bennett to process your warranty claims on this product line.

To order the Home Study Course for GoPump dispensers, please fill out the attached Order Form and send it in to:

Bennett Technical Support
