

## Fleet Card Option in 3k Series

---

### Fleet Card Option for 3k Series Dispensers and Pumps

eFueling Technologies

E J Ward

Megatronics

Multiforce

SCI

Trak

VST

---

If you stopped by our booth at the PEI/NACS trade show in October, you would have seen one of our commercial dispensers with two different fleet management systems integrated into the electronics door. We were showing systems from both Multiforce and Trak Engineering integrated into our dispenser. Both Multiforce and Trak have been certified by Bennett to field install their systems into our dispenser.

Other systems, listed below, are in various stages of certification. Certification includes: successful development of an RS485 interface to the commercial 3k fuel protocol to eliminate the need (and cost) of "Pulse Output" technology, testing by Bennett engineering to UL's rain-test standard, and various Bennett engineering tests for electrical compatibility, signal noise, etc. When certifications are complete, we will send you announcements. For your customer, these developments mean lower overall equipment costs, lower installation costs, and increased convenience for the fuel customer.

Multiforce—certified

Trak Engineering—certified.

The following are in various stages of certification:

eFueling Technologies

E J Ward

Megatronics

SCI

VST
