**TMS Radio Frequency Control
Console and Bennett 3k Retail
Dispensers**

**Replace your mechanical
dispensers with modern 3k
electronic dispensers**

**No need to run additional conduits
or wiring**

Triangle Micro Systems Radio Frequency Control Console

Please find enclosed a sales flyer from Triangle Micro Systems (TMS) describing their TMS EZ Console that was designed to work specifically with the Bennett 3k series electronic pumps and dispensers.

With the run-up in fuel costs, many marketers have a need to upgrade their mechanical analog computers. This presents an opportunity to sell electronic dispensers and get rid of the concerns with overtaxing these mechanical devices.

In some cases, these marketers may not have any console, but want to add a console when they upgrade to electronic dispensers. Typically in these cases a new conduit would have to be run to house the additional data wiring required for a console.

The TMS EZ Console with optional “radio frequency control” allows the marketer to add a fuel control console to his facility without breaking ground to add data wiring.

The enclosed flyer from TMS briefly describes the radio frequency controlled TMS EZ console. Additional details are available from TMS. Bennett is not selling the TMS EZ console, so contact TMS if you wish to purchase.
