## **Bennett Pump Company's *BlueFueler*<sup>®</sup> line of DEF dispensers receives National Institute of Standards and Technology (NIST) Weights and Measures approval.**

**March 18, 2010-** Bennett Pump, Spring Lake, Michigan, has received Weights and Measures approval for its *BlueFueler*<sup>®</sup> 100-200 Series line of DEF dispensers and suction pumps. These models are ideal for commercial fleet applications, retail truck stops and service garages. Available in both suction and remote versions, the *BlueFueler*<sup>®</sup> is designed for IBC tote, above ground tank and under ground tank applications.

"We are delighted with the Weights and Measures approval of our DEF *BlueFueler*<sup>®</sup> line of dispensers." says Tom Thompson, President of Bennett. "We believe this is another very important requirement of the newly forming DEF storage and dispensing community in that they will demand their equipment meet the higher standards level of Weights and Measures approval."

The *BlueFueler*<sup>®</sup> uses a high quality, stainless steel rotary meter which is engineered for high reliability and low cost of ownership. The Bennett electronics for the *BlueFueler*<sup>®</sup> line is a proven, highly dependable system which has been in use for several years in the Bennett 3000 Series line of fuel pump dispensers. Options include pulse output boards for interface to card lock systems and retail electronics for point-of-sale interfaces.

"We have visited with a large number of fleet owners and truck stop operators and believe we have targeted exactly what they are looking for with our *BlueFueler*<sup>®</sup> line", says Alan Levine, Vice President of Business Development at Bennett. "We have a strong engineering team who has developed a world-class product at a very attractive price point".

### **About Bennett Pump**

Bennett Pump is a subsidiary of the Hines Corporation based in Spring Lake, Michigan. Since 1919, Bennett has been a worldwide leader in manufacturing commercial and retail fuel dispensers in addition to supplying global OEMs with meters and pumping units.
