

3000 SERIES

SPEC 200 WITH X19 ELECTRONICS

MODULAR UPPER DOOR

The modular upper door is designed for fleet systems or seamless payment system upgrades as payment standards change.

X19 SURFACE-MOUNT ELECTRONICS

The X19 single-board, conformal-coated, surface-mount electronics are significantly more efficient and provide more processing power.

These electronics only draw 1.03-Amps of power during flow and only .71-Amps when idle.

This is less power draw than a normal 100-watt light bulb.

EMV PAYMENT W/ NFC

Bennett EMV Package: EMV ready hybrid chip card reader w/ PCI compliant & EMV ready EPP and NFC reader

2-TIER PRICING

An optional feature of the X19 electronics is 2-tier price displays for cash and credit or rewards based pricing

EXTENDED CABINET

The cabinet width has been extended by 6" (low hose) and 8" (high hose). This provides more room for payment systems in the upper cabinet & plumbing installation and serviceability in the lower cabinet.
