#### BENNETT CNG DISPENSER MAINTENANCE SCHEDULE

| Serial #: DIN #: | Company Name: |  |
|------------------|---------------|--|
|------------------|---------------|--|

**CAUTION:** Only trained personnel may work on dispensers.

CAUTION: The emergency shut off valve if installed must be closed.

CAUTION: All traffic/personnel shall be prevented from coming within 20 feet (6 meters) of the dispenser device.

CAUTION: All electrical power to the device and all associated circuits must be shutoff at the main electrical disconnect.

This maintenance schedule and log will help you keep accurate maintenance records and can help prevent avoidable down time due to equipment failure. Should you notice an error or any questionable item in this document or if further assistance is needed please contact the Bennett Technical Service Department at 1-800-423-6638. **Note:** Dispensing equipment should be checked as recommended by a trained personnel to verify proper working condition. Follow the suggested maintenance frequency and record results in the maintenance log. Keep in a readily accessible location.

<sup>\*</sup> Refer to the original manufacturer's maintenance instructions for more information.

<sup>\*\*</sup> Results - A = Acceptable; Adj = Adjustment; C = Corrected; Cal = Calibrated; N/A = Not Applicable; NR = Needs Repair; O = Other; R = Replacement

#### **EXTERIOR**

| ID# | Dispenser Components  | Description   | Frequency     | Notes: |
|-----|-----------------------|---|---------------|--------|
| A1  | Dispenser Doors       | Check for proper orientation, scratches and dents.  | Semi-Annually |        |
| A2  | Dispenser Panels      | Check for proper orientation, scratches and dents.  | Semi-Annually |        |
| A3  | Display Windows       | Inspect for any scratches or evidence of mistreatment.  Check to be sure that the displays are easy to read, lit, and clean.                            | Semi-Annually |        |
| A4  | Door Locks            | Inspect all locks to verify that they are intact and not coming loose.  | Semi-Annually |        |
| A5  | Emergency Stop Switch | Check for any scratches, dents, cracks, pealing of graphics, and visible damage.  | Semi-Annually |        |
| A6  | Foundation            | Anchor bolts and dispenser frame solid and in good condition.   | Semi-Annually |        |
| A7  | Graphics/Decals       | Inspect for any scratches, pealing, dents, discoloration or evidence of mistreatment.   | Semi-Annually |        |
| A8  | Hanging Hardware      | Check under and around for leaks.   | Semi-Annually |        |
| A9  | Keypads               | Inspect for any scratches, pealing of graphics, dents, discoloration or evidence of mistreatment.   | Semi-Annually |        |
| A10 | Nozzle Boots          | Check for proper operation. Inspect and verify that hardware is mounted securely.   | Semi-Annually |        |
| A11 | Speaker/Call Button   | Check for any noise interference and damage.  | Quarterly     |        |
| A12 | Structure of Frame    | Check for proper alignment and loose or broken parts.   | Yearly        |        |
| A13 | Valance               | Inspect for any scratches, dents, debris, or evidence of mistreatment. Make sure all valances are secure.   | Semi-Annually |        |
| A14 | Weather Seals         | Inspect all weather seals on the Electronics Door. Inspect for cracks and look for evidence of water traces. Repair if any water traces are discovered. | Semi-Annually |        |

### **INTERIOR**

| ID# | Dispenser Components | Description   | Frequency     | Notes: |
|-----|----------------------|---|---------------|--------|
| B1  | Electrical Cabinet   | Check for visible leaks, condensation, or damage. Inspect | Semi-Annually |        |
|     |                      | and verify there are no missing cover plates.             |               |        |
| B2  | Hydraulics Cabinet   | Check for visible leaks or damage.                        | Semi-Annually |        |

### **ELECTRICAL**

| ID# | Dispenser Components         | Description  | Frequency     | Notes: |
|-----|------------------------------|--|---------------|--------|
| C1  | Battery                      | Power off the dispenser to verify that the "AC OFF" remains on the display for 30 seconds. After 30 seconds, if the battery hasn't dropped out then press the "Battery Kill" switch to verify that the battery drops out. Power up the dispenser to verify that it powers up correctly and programming is correct. | Yearly        |        |
| C2  | Check Alarms (if applicable) | Check alarm operation.   | Quarterly     |        |
| C3  | * Conduit (Chico A05)        | Verify potting compound is not cracked, broken, or aging.  | Triennial     |        |
| C4  | Electronic Connections       | Check to make sure there are not breaks, cracks, or damage exposing conductors. Check connections for tightness.   | Semi-Annually |        |
| C5  | Junction Box                 | Make sure all connections are tight.   | Triennial     |        |
| C6  | Terminal Strip               | Make sure there are not any stray strands or loose terminals.  | Triennial     |        |
| C7  | Wiring                       | Visual inspection of wiring (general condition and tightness of terminal screws).  | Semi-Annually |        |

#### **HYDRAULICS**

| ID# | <b>Dispenser Components</b>        | Description  | Frequency     | Notes:  |
|-----|------------------------------------|--|---------------|---|
| D1  | Automatic Valves                   | Visually inspect for physical damage, contamination, leaks, or malfunctions.   | Quarterly     | If any of the descriptions are present, take it out of service immediately.   |
| D2  | Filters                            | Bleed pressure from unit properly before removing filter elements. Replace if flow is too slow or presence of oil, residue or dirt is present. |               | Note: The filter should be changed when the flow falls below an acceptable level, or the pressure drop becomes too high. WARNING - DISCONNECT ELECTRICAL POWER AND PURGE GAS PER MANUFACTURER'S INSTRUCTIONS BEFORE SERVICING FILTER. |
| D3  | Hydraulic Fittings                 | Visually inspect for leaks.  |               | Using a soapy substance, spray on hydraulic connections and inspect for "bubbles" forming. Repair any leaks. <b>Note: Do not use a soapy substance with ammonia!</b>  |
| D4  | Pressure Relief Devices            | Visually inspect for leaks, damage, and if wire seal is intact.  |               | Pressure relief valves shall be repaired, adjusted, and tested only by the manufacturer and/or trained technicians.   |
| D5  | Pressure Transmitter               | Visually inspect for leaks and verify operation.   | Semi-Annually | Perform a leak test.  |
| D6  | Temperature Transmitter            | Verify operation and check temperature.  | Quarterly     |   |
| D7  | Valves - Solenoid, Check, and Ball | Verify operation, check line connectors, operating pressure, power supply, and valve control.  | Triennial     |   |

# OTHER EQUIPMENT

| ID# | Dispenser Components               | Description   | Frequency     | Notes:  |
|-----|------------------------------------|---|---------------|---|
| E1  | Breakaway Devices                  | Inspect for signs of damage, corrosion, partial separation,     | Monthly       | Replace every 3 years   |
|     |                                    | wetness, or staining.   |               |   |
| E2  | * Filter - Bennet Purge Air Supply | Verify that the filter is clean and dry.                        | Monthly       |   |
|     | Box (MERV 13)                      |   |               |   |
| E3  | Gas Detection Equipment            | Visually inspect for damage. Run a test and calibrate.          | Semi-Annually | Refer to the original manufacturers manual for specific recommended         |
|     |                                    |   |               | calibration periods. The gas detection system must remain functional during |
|     |                                    |   |               | maintenance operations on ventilation systems.                              |
|     |                                    |   |               |   |
| E4  | Hose and Hose Connections          | Check for signs of damage (cuts, cracks, bulges, blisters, flat | Monthly       | Replace any damaged hoses and/or connectors.                                |
|     |                                    | spots, kinks, leakage, or worn spots). Perform a hose leak      |               |   |
|     |                                    | test.   |               |   |
| E5  | Vehicle Fueling Connections        | Check the flow rate from each nozzle. Run a transaction         | Monthly       | Replace every 3 years.  |
|     |                                    | from dispenser to ensure to leakage at nozzle.                  |               |   |

#### **DISPENSER TESTS**

| ID# | Dispenser Components                            | Description  | Frequency     | Notes:   |
|-----|---|--|---------------|--|
| F1  | Alarms (visual or audible)                      | Verify signals.  | Monthly       |  |
| F2  | Card Reader Test                                | Verify that it is working properly (if applicable). <b>Note:</b> The   | Annually      | Refer to the Bennett Pump SSP Programming, Service, and Parts Manual for   |
|     |   | card readers are dual sided (track 1 and track 2).   |               | service information.   |
| F3  | Communication Test                              | Verify dispenser is communicating with the console.  | Annually      |  |
| F4  | CPU Test  | Verify that the system has detected a fault.   | Annually      |  |
| F5  | Encryption Test                                 | Test the injection used to encrypt the Debit Card PIN Pad (if applicable).   | Annually      |  |
| F6  | Gas Detection Equipment                         | Test and Re-Calibrate  | Semi-Annually | Maintenance, inspection, calibration, and testing records must be kept for a minimum of 3 years.   |
| F7  | Handle Switch Test                              | Verify if the correct pump handle is displayed on the screen and activates with movement.                          | Annually      |  |
| F8  | Hydraulics - Fill Line                          | Leak Test - High and Low Pressure  | Annually      |  |
| F9  | Hydraulics - Vent Line                          | Leak Test  | Annually      |  |
| F10 | Keyboard, Switch and Beeper<br>Test             | Verify switches for the product buttons, buttons on the programming keypad, and beeper are functioning.            | Annually      |  |
| F11 | PIN Pad Test (soft, numeric, and function keys) | Verify that every key on the module are functioning.   | Annually      |  |
| F12 | PLC Test  | Verify dispensers RS485 communication with the PLC is working.   | Annually      |  |
| F13 | Printer Test                                    | Receipt prints legibly and matches display. Check receipt (pump side, product, PPM, mass, and total).              | Annually      | Refer to the <i>Bennett Pump SSP Programming, Service, and Parts Manual</i> for more information.  |
| F14 | Product Select Test                             | Verify all pads on the product select board function.  | Annually      |  |
| F15 | Purge Test                                      | Verify that the purge system activates and deactivates and the results of a timed purge procedure.                 | Annually      |  |
| F16 | RAM Test  | Verify if RAM is good or corrupted.  | Annually      |  |
| F17 | Run a Sale                                      | Check the functionality of the product displays, product select buttons, valves, totalizers, and training screens. | Annually      |  |
| F18 | Segment Test                                    | Verify all segments of all digits are visible on the display.  | Annually      |  |
| F19 | SSP Communication Test                          | View communication performance between the POS and the Module.   | Annually      | Refer to the <i>Bennett Pump SSP Programming, Service, and Parts Manual</i> for service information. <b>Note:</b> Report anything less than 85%. |
